TESTIMONIALS

1 ANDREW MAIN

"We've been working closely with Reformed Plastics for some years now, and on every project from concept to completion we can always rely on them to deliver a keenly priced product and service that is both Quality and Sustainable, which our children and staff Love!"

Thanks again and we look forward to the next project."

2 DOUG KIRBY

"Not only was delivery Prompt and Easy, the Reformed Plastics driver incredibly Helpful. The product is Great. 4 years on and looks Brand new. Better yet it's Recycled!"

3 BRIAN MEAKER

"I received the Octagonal Picnic Table on time and we unloaded safely over the low wall into the patio area using the wagon tail lift.

The table exactly fits our requirements! Thanks again for providing the effort and excellent service to deliver throughout the purchasing process."

REFORMED PLASTICS BESPOKE BENCHES

We offer a range of benches suitable for a variety of environments from your garden to public spaces. Due to the ever-increasing importance to recycle & protect the environment, our products are made from 100% recycled plastic. All the plastic used is recycled in the UK and is a perfect alternative to wood. Our aim is to help rebuild the environment by utilising a commodity, which people would otherwise just throw away, and so turn what to some would be rubbish into a valuable product for everybody.

The benefits of buying a Reformed Plastics bench:

- It is UK designed and built
- Bespoke design solutions
- Safe and secure
- No splintering
- Maintenance free
- Easy to clean
- A range of colours and textures

- Will never rot
- Strong, durable and wear resistant
- Sustainable sturdy alternative to traditional material.

Financial Benefits

The initial amount payable is more than wood, but our products are an investment as they never need to be replaced. When the costs of replacing fencing or garden furniture, both wooden and metal, due to corrosion, fatigue or natural deterioration plus maintenance materials are taken into consideration, solid plastic lumber and furniture quickly pays for itself and in the long run saves a lot of time and money. Achieving value for money is a key driver for any purchasing decision. Although some recycled products have greater up-front costs, their longevity and durability make them a more cost-effective option over the long term.

ABOUT US

The concept of Reformed Plastics was born 15 years ago from the curiosity of its founder. Being an engineer by profession, and having had his own UPVC Windows business, and also being the practical and inquisitive person that he is, one day he decided to find out what was really happening to the waste that people were so freely throwing away. His research and interest lead him to focus on plastics, how it can be recycled and what it could be reused for.

He discovered that the USA & a few European countries had been recycling and remanufacturing waste plastics into alternative timber products for many years, instead of throwing it all into landfill! Over time, slowly but surely he developed a few basic products in the form of planks and posts and very soon he began to receive interest from people wanting to know more about this revolutionary product that is both an environmentally friendly alternative to normal timber and sustainable which means it will save them a lot of money in the long term!

From then on, the rest as they say is history.
