

WHAT TO DO IN...

YOUR GARDEN THIS AUTUMN

Autumn is the time to get down to work in your garden. At Reformed Plastics we offer everything from fencing to furniture to help transform your garden.

At Reformed Plastics all of our products are made from 100% recycled plastic. We manufacture products ourselves and then sell direct to the Domestic and Commercial sector.

Due to ever increasing importance to recycle & protect the environment, our products are made from 100% recycled plastic, and is the perfect alternative to wood. Our aims are to help rebuild the environment by utilizing a commodity, which people would otherwise just throw away, and so turn what to some would be rubbish into a valuable product for everybody.

Our plastic has many practical & very useful properties & has an infinite range of different uses, some of which being as decking, fencing, outdoor furniture, planters, boardwalks, landscaping, bollards, signage & construction etc. The list of possibilities is endless and the long-term advantages it has over traditional materials are staggering!

It's a great investment, as it never needs to be replaced due to its high strength and durability, therefore it quickly pays for itself in the long run. In short, it's worry free!

WHY RECYCLE?

Recycling is an excellent way of saving energy and conserving the environments natural resources. One recycled plastic bottle would save enough energy to power a 60-watt light bulb for 3 hours. The unreleased energy contained in the average dustbin each year could power a television for 5,000 hours.

We offer closed loop recycling, by diverting post consumer plastic waste from landfill and manufacturing it into a huge variety of useable products.

For example 42,000 plastic 500ml bottles = 1 tonne = 7.7 picnic tables (130 Kgs ea.).

ABOUT US

The concept of Reformed Plastics was born over 15 years ago from the curiosity of its founder. Being an engineer by profession, and having had his own UPVC Windows business, and also being the practical and inquisitive person that he is, one day he decided to find out what was really happening to the waste that people were so freely throwing away. His research and interest lead him to focus on plastics, how it can be recycled and what it could be reused for.

He discovered that the USA & a few European countries had been recycling and re-manufacturing waste plastics into alternative timber products for many years, instead of throwing it all into landfill! Over time, slowly but surely he developed a few basic products in the form of planks and posts and very soon he began to receive interest from people wanting to know more about this revolutionary product that is both an environmentally friendly alternative to normal timber and sustainable which means it will save them a lot of money in the long term! From then on, the rest as they say is history.

The benefits of Reformed Plastics products:

- It is UK designed and built
- Bespoke design solutions
- Safe and secure
- No splintering
- Maintenance free
- Easy to clean
- A range of colours and textures
- Will not need painting or staining
- Will never rot
- Strong, durable and wear resistant
- Sustainable sturdy alternative to traditional material.
- Non-slip decking
- Lasts for over 50 years
- Resistant to vandalism
- Resistant to salt water
- Resistant to chemicals
- Resistant to insects and bacteria

WHY ARE OUR PRODUCTS DIFFERENT?

Plastic lumber is the perfect alternative to anything that has ever needed maintaining. It can be cut with a regular saw, drilled, nailed or screwed into and routed as easily as wood, but can also be cleaned with anything from only a damp cloth to a pressure washer if you wish, without causing any harm.

FINANCIAL BENEFITS

Achieving value for money is a key driver for any purchasing decision. Although some recycled products have greater up-front cost, their longevity and durability make them a more cost-effective option over the long term.

WOOD vs PLASTIC

	Wood	Plastic
Stain-resistant	X	✓
