

### How would you assess Reformed Plastics' overall performance & customer service?

From the initial quotation visit to the fitting team, it was a friendly & professional service which we would highly recommend.

### How has choosing plastic decking benefited your family life?

In the 5+ years we have had the deck we simply need to jet wash the deck once a year to keep it looking like new. During the summer months we are known to use the area from dawn until dusk, but in addition we now have an area which is usable in all weathers, and where our children have been able to play happily & safely during wet and cold conditions.

### Would you recommend Reformed Plastics' products & services to you friends & family?

The product has far exceeded our expectations! We have a beautiful deck which is envied by our neighbours, friends and family and as such we would highly recommend Reformed Plastics to all.

# FAMILY LIFE ON THE DECK

Back early in the summer of 2010 we had the pleasure of installing a 30sq metre deck in the rear garden of the Bradbury's lovely family home.

They had recently moved into their newly built house 2 years previous and decided it was time to put they own stamp on the garden by asking us to replace the original small area of wood decking that had already started to rot (after only 2 years!), and create them a relaxing & inviting outdoor dining area that could also be shared as a safe play space for kids and the whole family to enjoy!

We even installed white LED lights to frame the edge of the deck and illuminate the area so the good times could continue even once the sun has set.

## MEET THE BRADBURY'S!

A modern dual income hard working family with 2 young children, living together in a 3 story semi-detached town house within an exciting growing community in Wiltshire. In the Bradbury family there is Simon (Dad), Sara (Mum), Ella (swimming ballerina) and Oliver (football loving cheeky monkey). Just your "average" down to earth family really!

### What's your family life philosophy?

Work hard - play hard, and enjoy life with the ones you love.

### How do you decide when & why to invest in larger purchases?

For us it's about value for money and quality products, whilst enhancing our house value. We

saw the garden as a key area for investment with an area which not only met our family requirements, but also added value to our property if a time ever came to sell it.

### What attracted you to recycled plastic decking instead of wood?

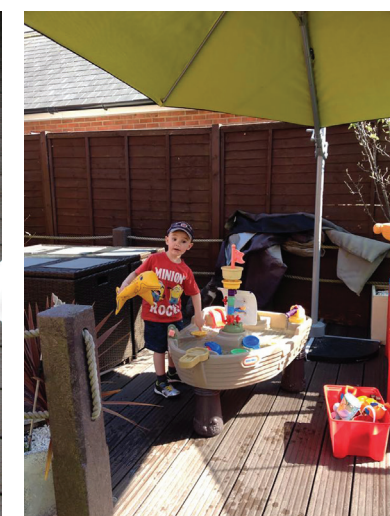

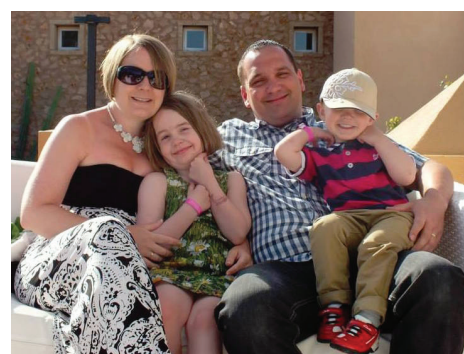

We had a timber deck in our garden for only two years which had to be treated each year and had started to rot. Alongside this it was slippery for the children to play on in wet and cold weather, and we wanted an area within our garden which was maintenance free and could be used all year round. So after researching the various products available we turned to a plastic decking solution that met all of our needs.

### Why did you choose Reformed Plastics to supply & install your deck?

They were a local company with a good reputation who understood our needs when they came and quoted for the work, which followed through to the installation team who completed the fitting.

### How did the price compare to alternative materials & installers?

Whilst it was more of an investment than a wooden deck the benefits of the plastic deck far outweigh the cost difference, and the cost to life ratio far exceeds the wooden alternatives.

"Reformed Plastics built a wonderful deck in our garden over 5 years ago and it still looks like new! Just a quick wash down in the spring and we are set for the summer. The best garden investment we have ever made!"

- Sara Bradbury - (June 2010) - Amesbury (Feedback Received - October 2015)

- Quality Decking, Fencing & Furniture.
