

WHAT TO DO IN...

YOUR GARDEN THIS WINTER

Don't let the weather stop you from enjoying your outdoor space

During the winter the damp and blustery weather can make it easy for us to neglect our outdoor space, both at home or work. Having said this, we can expect sunny yet cold days, which are great days for really sorting our gardens out.

Extreme weather can have disastrous affects on our outdoor furniture, fences, planters, and plant borders, especially if they are made from wood, as wood can split, splinter, crack and rot in British weather.

Also wooden decking and walkways can become dangerously slippery when wet, which makes them a potential death trap - especially for children and the elderly who might not be as steady on their feet.

All of our decking and walkway products come as anti-slip as standard! This is a great feature as it means that you can enjoy your garden and outdoor area even in wet weather, without the fear of slipping or falling over. Not only are our products anti-slip, they do not split or splinter, will not rot or decay and are absolutely maintenance free, guaranteeing them to last over 50 years!

If you want to ensure that your garden will be ready to use this spring then invest in our long-lasting, affordable and durable outdoor products.

From benches to walkways, we stock a variety of fantastic outdoor products that will transform the look of your garden and save you money in the long run.

WHY RECYCLE?

At Reformed Plastics all of our products are made from 100% recycled plastic. We manufacture products ourselves and then sell direct to the Domestic and Commercial sector.

Due to ever increasing importance to recycle & protect the environment, our products are made from 100% recycled plastic, and is the perfect alternative to wood. Our aims are to help rebuild the environment by utilizing a commodity, which people would otherwise just throw away, and so turn what to some would be rubbish into a valuable product for everybody.

WOOD vs PLASTIC

	Wood	Plastic
Stain-resistant	X	✓
NO splinters	X	✓
NO warping	X	✓
NO splitting	X	✓
NO rotting	X	✓
NO need for treating	X	✓
NO need for sanding	X	✓
Child friendly	X	✓
Non-slip decking	X	✓
NO maintenance	X	✓
Average maintenance cost per year	£150	£0

WHY ARE OUR PRODUCTS DIFFERENT?

Plastic lumber is the perfect alternative to anything that has ever needed maintaining. It can be cut with a regular saw, drilled, nailed or screwed into and routed as easily as wood, but can also be cleaned with anything from only a damp cloth to a pressure washer if you wish, without causing any harm.

FINANCIAL BENEFITS

Achieving value for money is a key driver for any purchasing decision. Although some recycled products have greater up-front cost, their longevity and durability make them a more cost-effective option over the long term.

ABOUT US

The concept of Reformed Plastics was born over 15 years ago from the curiosity of its founder. Being an engineer by profession, and having had his own UPVC Windows business, and also being the practical and inquisitive person that he is, one day he decided to find out what was really happening to the waste that people were so freely throwing away. His research and interest lead him to focus on plastics, how it can be recycled and what it could be reused for.

He discovered that the USA & a few European countries had been recycling and re-manufacturing waste plastics into alternative timber products for many years, instead of throwing it all into landfill! Over time, slowly but surely he developed a few basic products in the form of planks and posts and very soon he began to receive interest from people

wanting to know more about this revolutionary product that is both an environmentally friendly alternative to normal timber and sustainable which means it will save them a lot of money in the long term! From then on, the rest as they say is history.

The benefits of Reformed Plastics products:

- It is UK designed and built
- Bespoke design solutions
- Safe and secure
- No splintering
- Maintenance free
- Easy to clean
- A range of colours and textures
- Will not need painting or staining
