

RECYCLING NEVER LOOKED SO GOOD

At Reformed Plastics all of our products are made from 100% recycled plastic. We manufacture products ourselves and then sell direct to the Domestic and Commercial sector.

Due to ever increasing importance to recycle & protect the environment, our products are made from 100% recycled plastic. The plastic used is recycled in the UK and is the perfect alternative to wood. Our aims are to help rebuild the environment by utilizing a commodity, which people would otherwise just throw away, and so turn what to some would be rubbish into a valuable product for everybody.

Our products have many practical & very useful properties & has an infinite range of different uses, some of which being are as decking, fencing, outdoor furniture, planters, boardwalks, landscaping, bollards, signage & construction etc. The list of possibilities is endless and the long-term advantages it has over traditional materials are staggering!

It's a great investment, as it never needs to be replaced due to its high strength and durability, therefore it quickly pays for itself in the long run. In short, it's worry free!

We recycle plastic and then manufacture goods from it, we produce recycled plastic furniture for use in gardens and patios and we retail recycled plastic products such as recycled plastic fencing and recycled plastic decking.

The concept of Reformed Plastics was born over 15 years ago from the curiosity of its founder. Being an engineer by profession, and having had his own UPVC Windows business, and also being the practical and inquisitive person that he is, one day he decided to find out what was really happening to the waste that people were so freely throwing away. His research and interest lead him to focus on plastics, how it can be recycled and what it could be reused for.

He discovered that the USA & a few European countries had been recycling and remanufacturing waste plastics into alternative timber products for many years, instead of throwing it all into landfill! Over time, slowly but surely he developed a few basic products in the form of planks and posts and very soon he began to receive interest from people wanting to know more about this revolutionary product that is both an environmentally friendly alternative to normal timber and sustainable which means it will save them a lot of money in the long term! From then on, the rest as they say is history.

WHAT CAN THE PLASTIC BE USED FOR ?

The manufactured plastic has many practical and very useful properties. The main base of our products are in the form of planks and posts which can be used on their own for garden fences, both low for front gardens and high for side and back fences for instance, along road sides and around fields and paddocks just to name a few. It is also possible to produce a number of other products out of our plastic, such as picnic tables. These would vary in size, suitable for adults and children. Park benches, outdoor tables, square or rectangular plant boxes, decking and seating... the list is endless.

DOES IT NEED TO BE CLEANED??

Our products only need to be cleaned after a spillage. The collection of airborne dirt is inevitable and we would recommend a simple spray-down with a hose or wipe over with a damp cloth on a regular basis to ensure that your purchase is kept in the best condition.

FINANCIAL BENEFITS

Achieving value for money is a key driver for any purchasing decision. Although some recycled products have greater up-front cost, their longevity and durability make them a more cost-effective option over the long term.

WHY ARE RECYCLED PLASTIC PRODUCTS DIFFERENT?

Plastic lumber is the perfect alternative to anything that has ever needed maintaining. Plastic lumber can be cut with a regular saw, drilled, nailed or screwed into and routed as easily as wood.

- Does not rot
- Will not need painting or staining
- Is wear resistant
- Resistant to vandalism
- Resistant to salt water
- Resistant to insects and bacteria

HOW STRONG IS IT?

It is extremely solid and strong being able to withstand stress levels of well over 10 tons. It is heavy, durable, virtually indestructible and will not need to be replaced. In short, it is worry free.

WILL IT BURN?

Nothing is completely Non-Flammable. Our products do have an initial high flame resistance level. However, if encouraged, our plastic can show similar burning characteristics to wood.

IS THERE A COLOUR CHOICE?

Yes. Our main colours are black and brown. However, we can produce products to a choice of colours! This removes the need for painting & staining. So whatever colour is required... just ask!

We hope that this page has answered most of your questions. However, please do not hesitate to contact us if there is any further information you would like...

- Quality Decking, Fencing & Furniture.
- 100% Recycled Plastic.
- Can be worked with like wood.
- Does not rot, split or splinter.
- Strong, Durable & Weather Resistant.
- Maintenance Free & lasts over 40 years!
- Local, Friendly Family run business.
- Unique, High Quality Personal Service.
- Nationwide Delivery.
