

CHILDREN'S PLAY AREAS

Our products are perfect to be used in children's play areas ensuring they have an eco-friendly and safe environment to play in.

Due to the ever-increasing importance to recycle & protect the environment, our products are made from 100% recycled plastic. All the plastic used is recycled in the UK and is a perfect alternative to wood. Our aim is to help rebuild the environment by utilising a commodity, which people would otherwise just throw away, and so turn what to some would be rubbish into a valuable product for everybody.

The benefits of using Reformed Plastics to create your children's playground are:

- It is UK designed and built
- Bespoke design solutions
- Safe and secure
- No splintering
- Maintenance free
- Easy to clean
- A range of colours and textures
- Will not need painting or staining
- Will never rot
- Sustainable sturdy alternative to traditional materials
- Resistant to salt water
- Resistant to chemicals
- Resistant to insects and bacteria
- Resistant to vandalism
- Non-slip decking
- Lasts for over 50 years
- Strong, durable and wear resistant

PARK SCHOOL, BOURNEMOUTH

Park School (Bournemouth) have worked with the Reformed Plastics team for some years now. During this time, the school has revamped their outdoor areas in many ways.

Investing in a range of products including Picnic tables, kit shelves, a nursery bridge, sandpits, theatre stage, a picket fence and new signage. They even bought our Reformed Plastics train for their playground, which the children love! We received a Fantastic testimonial from their Bursar:

"We've been working closely with Reformed Plastics for some years now, and on every project from concept to completion we can always rely on them to deliver a keenly priced product and service that is both Quality and Sustainable, which our children and staff Love! Thanks again and we look forward to the next project."

– Andrew Main (Bursar)

Our products are ideal for school environments, as they do not split or splinter, are resistant to bacteria and do not rot. This makes them safer for children to use, as it reduces the risk of injury that may be caused by wooden splinters or rotting, unsanitary wood!

ST.CATHERINE'S SCHOOL, COLEHILL

We also supplied St.Catherine's School of Colehill, Dorset with several pieces of Multi-coloured Outdoor Furniture to brighten up their Playground. These will last them forever, stay looking great & keep the children safe. By choosing to purchase Reformed Plastics furniture, they have also prevented the equivalent of 32,340 Plastic 500ml Bottles from going into a landfill!

FINANCIAL BENEFITS

The initial amount payable is more than wood, but our products are an investment as they never need to be replaced. When the costs of replacing fencing or garden furniture, both wooden and metal, due to corrosion, fatigue or natural deterioration plus maintenance materials are taken into consideration, solid plastic lumber and furniture quickly pays for itself and in the long run saves a lot of time and money. Achieving value for money is a key driver for any purchasing decision. Although some recycled products have greater up-front costs, their longevity and durability make them a more cost-effective option over the long term.
